

PRESS RELEASE

## PKN ORLEN joins forces with ETREL to roll out e-mobility offering

27.5.2020; Katowice, Grosuplje

*PKN ORLEN reinforces its low-emission endeavours with the implementation of a Charge Point Management System and introduction of a new EV charging app, [ORLEN Charge](#). Etrel was awarded the contract for the [OCEAN e-mobility platform](#).*

PKN ORLEN is retrofitting its existing mobility infrastructure, complementing fueling locations with fast EV charging stations. The network consisting of over 70 AC and DC charging stations across Poland and the Czech Republic is planned to further expand in the coming years.

Etrel OCEAN platform will provide PKN ORLEN with all the necessary functionalities for the seamless provision of charging services on the Polish market as well as an opportunity for cross-border network expansion through roaming and smooth introduction of payable charging services.

»Electromobility is a fast-growing branch of the economy. At PKN ORLEN, we predict a bright future for alternative fuels. Therefore, we are consistently pursuing the project to roll out fast-charging infrastructure for electric vehicles in Poland. We want our efforts to help raise public awareness of low-emission transport.«, said **Jarosław Dybowski**, Executive Director of PKN ORLEN for Energy.

»We see that many oil and petrol companies make a leap to e-mobility as a logical progression of their business. Onboarding partners such as PKN ORLEN onto the OCEAN platform gives

recognition to the system we've built. Such projects challenge us to accelerate the development of more future-oriented functionalities, that will support our partners in the years to come.«, added **Rok Poteko**, Etrek Sales and Business development CEE.
